

QUICK ASSEMBLY INSTRUCTIONS

1st step: introduce the plastic piece (that you see at your left hand) inside the mini nylon globe as in the photo below at your right hand. Must be well centered in a way it stays in place thanks to the notches the piece of plastic has at the bottom.

2nd step: introduce the bulb in the slot at the top of the square plastic piece, by pushing with your fingers, (see photo at your left) sideways the electrical cords of the bulbs into it.

You may want to give it a drop of Super Glue to keep it in place.
